

Premium GP HYDRAULIC FLUID ALL PURPOSE FORMULA

MFA Oil Premium GP Hydraulic Fluid is formulated using only high quality Group II, severely hydrocracked, high viscosity index, paraffinic base stocks. It is a combination fluid for hydraulic systems, transmissions, differentials, wet brakes and wet clutches. It is dyed purple to enhance leak detection.

MFA Oil Premium GP Hydraulic Fluid provides excellent extreme pressure protection for maximum gear life. It has balanced friction characteristics for wet brake and wet clutch systems, a high level of corrosion and rust inhibition, as well as high water tolerance. It has good filterability characteristics for optimum hydraulic operation in transmissions operating at high temperatures.

It is suitable for use as hydraulic or transmission fluid in various non-automotive applications. However, it is not to be used as a crankcase lubricant or in automotive or automatic transmissions in which ATF, DEXRON®III, DEXRON®II, DEXRON® or ATF Type F is recommended.

- Provides wet brake and clutch performance
- Prevents brake chatter and grabbing
- Provides excellent protection for maximum gear life
- Improves water tolerance
- Dyed purple to enhance leak detection
- Provides multi-purpose lubricant for transmissions, hydraulic systems and final drives
- Is suitable for use in most hydrostatic power transmission systems
