

Bucky's Best X-TRA TACK BAR & CHAIN OIL

Bucky's Best X-Tra Tack Bar & Chain Oil is specially formulated to provide optimum lubrication of high-speed saw bars and chains over a wide range of seasonal weather conditions. It also functions as a solid film agent, delivering boundary lubrication to critical components that operate in dry conditions.

PERFORMANCE BENEFITS

- Anti-sling tackifier additive keeps oil on the chain at high cutting speeds.
- Rapid oil penetration provides critical lubrication at saw start-up.
- Special rust inhibitors help prevent equipment rust while not operating or in storage.
- Advanced lubricating properties reduce friction and heat build-up on the cutting chain and guide bar.

PRODUCT APPLICATION

Bucky's Best X-Tra Tack Bar & Chain Oil is recommended for industrial, commercial and residential chains and saws found in:

- Sawmills
- Forest products industry
- High-speed cutting applications
- Severe operating conditions

Always consult original equipment manufacturer's lubricant recommendation for proper fluid application.

Bucky's Best X-TRA TACK BAR & CHAIN OIL

Typical Characteristics

PROPERTY	TEST	BUCKY'S BEST X-TRA TACK
Viscosity, cSt @ 40° C	D-445	108
Viscosity, cSt @ 100° C	D-445	11.5
Specific Gravity, @ 60° F	D-1250	0.88
Flash Point, COC, °C (°F)	D-92	230 (446)
Pour Point, °C (°F)	D-97	-21 (-6)
Color	D-1500	3.5
Anti-Sling Tackifier		Yes

Minor variations in physical test results may occur through normal manufacturing.

Available In:

1 Gal, 5 Gal, Tote
